Matlab package GGM_gait_feature:

Paper: Interpretable Gait Recognition by Granger Causality
October 8, 2021

Installing

To let the codes running on your local machine for development and testing purposes, you need to download the package.

Running the tests

The main code:
`GGM_gait_feature.m`

uses the package `penalized` performing adaptive Lasso from
W. McIlhagga. penalized: A matlab toolbox for fitting generalized linear models
with penalties. Journal of Stat. Software, Articles, 72(6), 2016.
